2017 - 2018 SEASON

# WHO WE ARE

**FIRST Team 6513 Wyvern Robotics is based at** Woodbridge College in Woodbridge, Ontario. We are the second FIRST robotics team in the York Region District School Board and one of the thousands of teams around the world.

This is our second year competing in the FIRST Robotics Competition and this year we plan to push ourselves further in our pursuit of encouraging STEAM education in the community, getting more students involved in our school, and building the best robot we possibly can!

However, we are a non-profit organization and we rely solely on support from the community to work towards our goals. Any support in the form of monetary sponsorships or in-kind donations are welcomed and needed to sustain our team and to ensure that we are making a lasting impact on the community around us.

Without you FIRST Team 6513 Wyvern Robotics could not exist and we are grateful to our awesome sponsors and to all the support we've received from the community!

**Thank you for your interest** in supporting Wyvern Robotics! In our sponsorship package you will find information about our team's accomplishments, our mission, our plans to encourage STEAM education in the community, our tiers of sponsorship and our sponsorship form.

**If you are interested** in contacting our lead mentor or you would like to ask a general inquiry please select a form of communication below. Once again, thank you for your interest in supporting FIRST Team 6513 Wyvern Robotics!

## WHAT WE'VE DONE

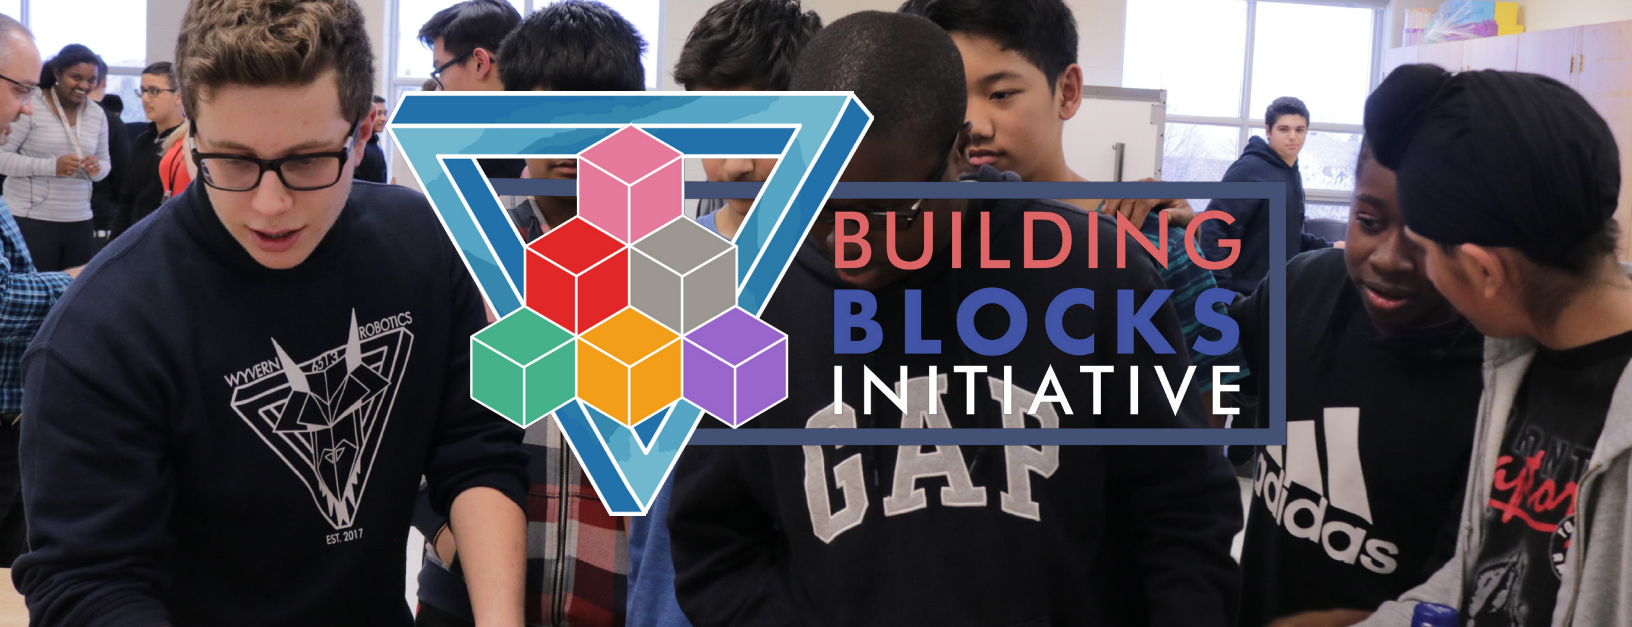

**In the 2016 - 2017 Season FIRST Team 6513 Wyvern Robotics competed at** the DURHAM COLLEGE Event where we placed eighth out of forty-one teams, won the Rookie Highest Seed Award, and were captains of the eighth alliance.

We then competed at the GEORGIAN COLLEGE Event where we placed thirteenth out of thirty-four teams, won the Rookie Highest Seed Award, won the Rookie Inspiration Award and were captains of the eighth alliance.

Finally, we were invited to compete at the Ontario Provincial Championship at the Hershey Centre where we placed fortieth of sixty teams.

We've had an incredible rookie season, but this year we're going to take it all the way to the World Championships!

Our team has also given several presentations encouraging STEAM education at elementary schools in the York Region School Board and Toronto Catholic School Board. Our goal is to present to every elementary school in our area before the end of 2018.

**FIRST Team 6513, Wyvern Robotics' mission is to educate students in the realms of STEAM (Science, Technology, Engineering, Arts, and Mathematics).**

We feel as though we've been given such an amazing opportunity to have teachers and mentors who are so supportive of our interest in STEAM and have given us so much of their time and knowledge and we feel that we should take all the things we've been so fortunate to learn and give younger students the same experience.

Under our Building Blocks Initiative, we plan to host Hours of Code in the community, conduct presentations and demonstrate how much fun learning about technology can be! We also plan on organizing a FIRST Lego League tournament for elementary students in future.

## WHAT WE NEED

**FIRST Team 6513 Wyvern Robotics needs** financial support to achieve our goals of encouraging STEAM education in the community and to compete at the best of our ability.

Our first robot was built with minimal tools and the most basic of parts and we were able to achieve more than we dared to imagine, but it had design flaws.

To prevent these design flaws and take our team to the next level we require sponsorship to fund a new tooling suite. Our team also requires funding, or in-kind donations, for new parts so we can build the best robot we possibly can.

In addition to our main funding goals for the 2017-2018 season, FIRST Team 6513 Wyvern Robotics requires funding for annual recurrences such as FRC entrance fees, Provincial Championship and World Championship fees, robot transportation fees, tournament transportation and lodging, and Building Blocks Initiative program funding.

# WYVERN ROBOTICS SPONSORSHIP TIERS

## PREMIERE SPONSOR

\$20 000+ in Monetary Value or Goods

- Your logo is displayed for 5 seconds before all team video productions
- The 2018 Robot will be named after your organization
- All Diamond, Gold, Silver, Bronze and Aluminum tier perks
